Domain Title: Life Skills

Introduction

The relevance of life skills in the context of prevocational education is already well established. It is a very essential aspect of education in the Mauritian context, that will prepare a large percentage of the prevocational school population to join the world of work or a system of apprenticeship from the age of 16.

Through life skills the prevocational students will develop attitudes, dispositions and social competences needed to become functional at both social and personal levels. Life skills will develop a wide range of psycho-social and interpersonal skills which will help students make informed decisions, communicate effectively develop coping and self-management skills. These will help them develop into healthy and well-balanced individuals leading a productive life and contribute in the development of a peaceful, healthy and sustainable environment. Life skills will equip the students with the knowledge, skills and attitude to face the challenges in their adult life and the world of work. It will develop an awareness of our history and inform the students of their rights and responsibilities as active citizens. They will learn movement and motor skills for an active participation in physical and leisure activities. They will be empowered to recognize the benefits of healthy lifestyles, analyse the risks and consequences of unhealthy lifestyles and to take responsible decisions to manage their own lifestyle and behavior. In short, this domain will help students develop into whole individuals with a good sense of significance, responsibility, competence and well being.

The objectives of the domain will be achieved through the following strands:

i. Movement and Personal Growth
ii. History and Heritage
iii. Values and citizenship
iv. Interpersonal Skills, Conflict Resolution and Emotion Management
v. Wellness and Self Care

ICT will be used as a support in the development of the strands.
The aims of Life Skills at Pre-Vocational Secondary

- Ensure that students understand the importance of a healthy and active lifestyle.
- Develop a range of movement and motor skills for a healthy and active life.
- Develop a range of interpersonal and social skills through games and activities.
- Develop an awareness of the past so as to understand the evolution of society to its present state.
- Inform students of their rights and responsibilities as active citizens for a sustainable development.
- Develop knowledge, skills and attitudes needed to preserve, appreciate and share our multiple cultural heritages.
- Develop skills to deter behaviours and lifestyles associated with crime, drugs and violence.
- Develop an atmosphere of peace and a sense of shared humanity. Demonstrate basic assertiveness strategies to manage interaction with others.
- Develop an understanding of the functioning of the human body.
- Develop action competence to reduce vulnerability to health problems.

Assessment objectives

Students will be assessed under the following objectives:

1. Knowledge and understanding of:
   - reasons for participation in physical activity and leisure.
   - their rights and responsibilities as active citizens.
   - the functioning of the human body.
   - the history of the nation.
   - the importance of preserving our national heritage.

2. Ability to:
   - Show a range of movement and motor skills.
   - Display positive attitudes towards physical activity and leisure.
   - Participate in activities according to the rules of each game.
   - Develop a range of positive values.
   - Preserve and respect our cultural heritage.
**Mode of Assessment**

**Activity and Project-based assessment**

Assessment in Life Skills will be mainly formative and continuous. Students will be given activities and tasks to work on while teachers will provide regular feedback for improvement. Project-based tasks and observation checklists will allow teachers to monitor students’ progress and assess their improvement. Behaviour changes, social skills, and attitudes will be assessed through observation checklists.

It is proposed that the students be lead towards the development of structured projects that will integrate the different strands in Life Skills as well as the other domains in the prevocational curriculum. They will be expected to apply the knowledge and skills acquired in the Life Skills domain to successfully carry out their project-based tasks and activities as well as draw from the knowledge and skills from other domains to successfully complete the project.
Curriculum content

**Year 1**

**Movement & Personal Growth**
Basic skills in team games:
